\$ cat summary.md

Product engineer first: I own the desktop and web apps at Littlebird, shipped end to end. Newest addition: building the agentic side. My features come with their own logs and traces; debugging takes minutes, not days.

\$ cat experience.md

Senior Software Engineer @ Littlebird Dec 2024-present · Remote

- # hire #4; own the user facing product, the desktop and web apps, shipped end to end
- # grew the client app from 0 to 10,000+ DAU across desktop, web, iOS, and Android, all from one shared codebase
- # own the desktop app; led the Tauri → Electron migration; built a custom release flow that ships different builds to different user cohorts, with single click updates and rollbacks
- # built core product features like meeting notes transcription and a flexible exclusion handler
- # added telemetry across the clients; issue debugging went from days to under an hour
- # built an LLM chat debugger the whole backend team now uses; agent quality investigations went from hours of digging to a few minutes
- # recently building the agentic side: Action Cards, on device MCP support, and a policy layer

Founding Engineer, Frontend · Employee #1 @ MiddlewareHQ Feb 2023-Nov 2024 · Gurugram, India

- # owned the web client and the Jira integration end to end
- # hacked the web app to run inside Atlassian Jira as a plugin; drove >50% of company MRR at its peak
- # shipped core dashboards: Cockpit, DORA Metrics, 360 Feedback; ~25% engagement lift
- # grew from 0 to 30+ enterprise clients; Unwrapped.dev hit 600+ signups on day one

Fullstack Engineer · Founding Engineer @ Synth (YC S21, now infer.so) Mar 2022-Feb 2023 · Remote, India

- # founding engineer on botless meeting notes, before ChatGPT existed
- # built the Google Meet Chrome extension, real time audio with no meeting bot; 4.8/5 store rating
- # Playwright coverage cut production defects ~20%; Electron work improved app performance ~50%
- # built Ask Synth, an AI topic suggestion feature; automated build and deploy with GitHub Actions

SDE Intern @ Requestly (YC W22, acquired by browserstack.com) Oct 2021-Mar 2022 · Remote, India

- # rule templates made creation ~20% faster; new onboarding lifted 30 day retention ~20%
- # built a pricing page visitor tracker and student discount flows with Google Sheets and Firebase
